Case no. 75

(Shri D.A. John Dennis, Tamil Nadu)

After perusal of the application, it was decided to recommend grant of NOC in this case for construction of GF+1 floor with the total height of 9.14 mtrs. (including mumty, parapet, water-storage tank etc.) with floor area of GF=FF=124.54 sqm.

Additional Agenda No. 1:

It has been decided that a self contained note may be sent to Ministry of Law seeking their advice on regularization charges being recommended by NMA in such cases where construction has been started even before the NOC has been granted. The regularization charges are recommended only in those cases, where in normal course NOC could have been granted had the owner applied for NOC prior to starting the construction. The justification for levying the charges is that the AMASR Act, 1958 (amended in 2010) came into effect very recently and the land owners within the regulated area, particularly those with very small land holding are still not aware about the provisions of the Act. Therefore to deny them the NOC, just because they started the construction work but applied at a later stage, would have been too harsh. Under these circumstances it has been decided to seek the guidance of Ministry Of Law as to whether such construction can be regularized by imposing a token regularization charge, and, if so where the money can be deposited, under which budget head. This amount can be utilized for providing tourist friendly facilities at the concerned monument.

Additional Agenda No. 2:

Discussed on 15th July, 2016 in the presence of following special invitees:
1. Shri Madan Singh Chouhan, Competent Authority, Madhya Pradesh
2. Shri Zulfeqar Ali, Superintending Archaeologist
3. Shri Nitin Srivastava, Surveyor Gr.-I

The Chairperson, NMA in her introductory remarks stressed upon the need to expedite framing of Heritage Bye Laws in respect of Centrally Protected Monuments. She referred to her meeting with Competent Authorities and officials of Archaeological Survey of India held on in Delhi.

Since the progress is not satisfactory it was decided to adopt the following measures:

i. Take up framing of Heritage Bye Laws in respect of 410 priority monuments in respect of which most of the NOC applications have been received in the past.

ii. The contouring of the protected and the prohibited areas of each monument may be completed taking into the account the areas presently under the possession of ASI and the protected/ regulated area therefrom. Detailed contouring will be required only in those areas where there is highly concentrated construction activity.

iii. It has been observed that the notification regarding the land where the protected monument is situated does not necessarily demarcate the protected area. Therefore, while efforts may be made to approach the State Government authorities for rectification by issuing Correction Notification, in which, area in possession of ASI can be notified. However, this process may take a long time and therefore efforts may be made to complete the Total Station of the protected area without waiting for the notification.

iv. Where Total Station has already been done the Contour Map may be prepared and Heritage Bye Laws of the Monument may be drafted. It is not necessary to wait for completion of all formalities before starting the drafting of Heritage Bye Laws.

v. During the extensive visit of monuments by Chairperson and Members in Mandu it was observed that the problem of encroachment of irregular construction do not pose much of a problem in this area. Therefore, it has been decided that CA, Bhopal may take up 5 monuments in the beginning and complete the Heritage Bye Laws of these monuments within 2 months. The list of monuments to be taken up for this purpose may be intimated to NMA within 1 week.

vi. It has been decided that the categorization of monuments approved by NMA may be sent to Ministry Of Culture once again for issuing notification.

vii. Regional Director and CA, Bhopal stated that it is necessary to engage a Conservation Architect on short term contract for handling the work related to Heritage Bye Laws. In addition a Surveyor is also required for this purpose. However, the work of the Surveyor can be entrusted for the present to the Surveyor attached to RD office provided the expenditure on TA & DA is met by NMA with the concurrence of DG, ASI.
viii. The issues relating to the template of Heritage Bye Laws were discussed and clarified, wherever required.
